Project 13-1347 H1

WATERMAIN SYSTEM IMPROVEMENTS WATERMAIN CONSTRUCTION ON SOUTH SHERIDAN WAY, INDIAN GROVE AND INDIAN ROAD CITY OF MISSISSAUGA

What are we doing?

- Constructing new watermains along South Sheridan Way, Indian Grove, and Indian Road as shown on the attached map.

Why?

- To upgrade the water system capacity and reliability in the Region of Peel.

When?

- We expect to start work around the first week of April 2021.
- The project should be completed in approximately 14 months. All work is under warranty for two years from the completion date.
- We will start restorations when all water system replacements and transfers are complete, and as weather permits.

Who can you call?

Contact Person	Responsibilities	Telephone Number
Nicole Sartor	Region of Peel Project Manager	(905) 791-7800 ext. 7832
Avalon Myers	Project Ambassador	(416) 457-3889
Brandon Vandermeer	Region of Peel Inspector	(647) 824-9821
Bob Clarke	Contractor	(416) 745-0707
Zoltan Tako	Contract Administrator (GM BluePlan Engineering)	(519) 824-8150
Yvonne Post	Contract Administration Support (GM BluePlan Engineering)	(519) 824-8150
Phemelo Mpoloka	Site Inspector (GM BluePlan Engineering)	(226) 332-1875

Working Hours

- Our Contractor's normal working hours are from 7 a.m. to 7 p.m. These hours are consistent with the local municipality's bylaws. We understand this may cause some inconvenience, but a shorter working day would mean the project would take longer to complete.
- Sections of the construction along South Sheridan Way and Indian Road will occur between 9 a.m. and 4 p.m. (off peak hours) to minimize traffic impacts when work is reduced to one lane of traffic.

Traffic Control

- South Sheridan Way will have lane closures with flag persons as well as a temporary road closure. Detour signage will be posted.
- Indian Road will have lane closures with flag persons.
- Indian Grove will be open to local traffic only.

Driveway Access

- Due to construction activities, we may need to block your driveway for a short time. We will contact you before we do this to arrange for the best time and for alternate access, if needed. If your driveway is blocked, you may choose to park on the street for a short time. If you need immediate access to your driveway, the Contractor will have road plates available to quickly allow access in and out of your driveway.
- Please call the Project Manager if you have special needs related to access or business hours.

Sidewalk and Walkways

- A temporary sidewalk will be constructed along the east side of Indian Grove while the existing sidewalk is removed for watermain construction. The existing sidewalk will be restored and temporary sidewalk removed once watermain construction and water service transfers are complete.
- Watermain construction crossing the walkways connecting Indian Grove to Wateska Boulevard and Tecumseh Public School will be completed outside of school hours in the evening or on a weekend.

Irrigation or Sprinkler Systems

- Please tell the Inspector or Contractor if you have underground irrigation or a sprinkler system outside your property line.
- You may wish to move the sprinkler lines to inside your private property to avoid damage.

Private Servicing

- Please tell the Inspector or Contractor if you have underground hydro or communication servicing to your property, or other underground infrastructure that you feel the Contractor should know about.

Trimming Trees

- If tree branches within the right-of-way interfere with construction, the Contractor will have the trees pruned before equipment enters the drip line of the tree.
- If tree branches on private property interfere with construction, they will be pruned back to the nearest suitable trunk, crotch or branch.
- The Contractor will ask you for permission before cutting any branches on private property. If you do not allow the Contractor onto your property to trim the branches, the branches will be cut vertically at the property line.

Interrupting Your Water Supply

- It is our goal to let you know 48 hours (2 days) in advance if we need to shut off your water. Occasionally, we may have to reduce this notice to 24 hours.
- If we have to shut off your water because of an emergency, we will do everything we can to fix the problem as quickly as possible.

Waste Collection

- Your garbage, recycling and organics containers will continue to be picked up on your regularly scheduled day. It is the Contractor's responsibility to move your garbage, recycling and organics bins to a location where our collection vehicles can pick them up. Empty containers will be returned to their corresponding addresses. Please make sure your house number is clearly marked on each bin.

Vibrations

- You may feel slight vibrations from the construction work.

Replacing and Taking Care of Your Sod

- We will replace any damaged sod as soon as we can.
- Our contractor will take care of the new sod for the first 30 days after it's laid down. After that, you can help the sod stay healthy by watering it early in the morning two or three (2-3) times a week, especially in hot weather.
- It is very common for the work area to settle a bit after construction. If you notice any settlement, please let the project manager or inspector know and we will ensure the contractor fixes it.

Repairing Your Driveway

- Driveways will be disturbed by watermain construction and replacement of the existing service valve. We will repair the driveway in the disturbed area. If you have a stamped concrete driveway, we recommend contacting the original driveway contractor to restore the driveway at the end of construction, to be reimbursed by the Region. Unfortunately, the Region **cannot** completely replace your driveway.
- If you have any concerns, please call the Project Manager.
- We will repair your driveway as soon as we can, but there may be a short delay.

Repairing the Road, Curbs, and Sidewalks

- We will start restoring the road, sidewalk and boulevard once all replacements and service transfers are complete and as weather permits.

Private-Side Servicing

- We will replace the water service pipe to your service box (the round valve near the property line).
- As the pipe between the service box and the building is probably the same age and condition as the watermain, you may wish to replace it to ensure a constant supply of high-quality drinking water to your tap. This is the property owner's responsibility; the Region cannot do this work for you.
- For more information on replacing the private-side water service, please visit <https://www.peelregion.ca/water/your-home/private-side-water-service.asp>

Project Updates

- The Region of Peel will always let you know if there are any major changes to the plans.
- We will try to disturb you as little as possible.
- Please call the Project Manager, Ambassador, or Inspector if you have any concerns or special needs.
